

# PAPAROA FARMERS MARKET RESEARCH & PROMO

 <https://www.facebook.com/PaparoaFarmersMarket/>

In August 2020, Kaipara Kai Hub profiled the Paparoa Farmer's Market via their social media page.

The Paparoa Farmer's Market runs every Saturday morning and has a range of local stall holders.

Kaipara Kai Hub is creating a database of producers and growers in the district.

Visiting local markets to find out what local people are growing, even at a small scale gives us a better understanding of what can grow in Kaipara.

We have gathered some information about what is tried and tested, what has been grown historically and what experimental crops have been grown in the past.

## Some findings from the market visit:

*"We get a good crop of macadamia nuts every second year"*

*"I remember in the 1970's someone experimented growing rice"*
